Cosmos Cubicle

The cosmos cubicle is a prime example of an "open" cubicle. Large and spacious, therefore very animal friendly.

This open system provides room enough for the cow to move naturally when getting up and down. Consequently the cows will lie down sooner improving milk production and hoof health.

Major Characteristics:

- Open cubicle
- plenty of head space
- simple and solid design
- neck bar height of 1.20m
- widely applicable
- easy to install
- adjustable brisket tube
