BARN EQUIPMENT LTD

# Save yourself time, space & money

*“Building a new cubicle house or renovating is an investment for the long term and therefore needs careful planning.”*

Computer aided illustration of a typical cubicle layout

## Who we are

**David R. Beech Barn Equipment Ltd** is a family run business specialising in the design, supply and installation of Dairy Housing Equipment.

## What we provide

**David R. Beech** will provide expert advice in designing or refurbishing dairy cattle cubicle housing. We offer all construction work from the small refurbishment and repair job, to the new green field project.

## Location

Based in the heart of Cheshire and covering North Wales, The North West and the Midlands.

## Fitting / installation

We offer a first class fitting service for all our products, or are happy to supply on a self-fit basis. We can provide computer aided drawings to assist design and installation.

## Technical support

Finally we offer full technical support on all our products and can be contacted any time of the day.

Suppliers of Livestock Housing Equipment

*We will listen to your plans and suggest several options according to your needs and wishes. Every detail deserves attention: cubicle design, matting, ventilation, feed front systems and drinking systems.*

## Galebreaker - The fast action door system for regular access

The Galebreaker products provide variable ventilation, protection and light for the ideal environment. Designed to optimise natural ventilation for all types of livestock housing using the latest fabric and access technology to enhance housing conditions.

Agri door and bay screen

Agri door

Variable ventilation systems

Based on strong, long lasting PVC coated fabrics with in-built UV protection. They have the ability to transmit light, enhance natural ventilation and at the same time protect against the worst weather conditions 365 days a year. Galebreaker systems are fully guaranteed for two years with a free four year extended graduated guarantee after that point.
