## Manure Scraper

An automatic scraper consisting of 2 single-winch drive units, a number of high quality synthetic corner wheels, and one or more scrapers.

The scrapers are pulled by means of an 8mm thick PE rope. This is an extremely animal friendly, low maintenance system which keeps the barn floor clean and dry

### Major characteristics:

- 2 drive units (0.55kw)
- Robust and solid construction, hot dipped galvanised
- PE rope is 8mm thick synthetic with tensile force of 6000kgs
- PE rope is extremely animal friendly
- Digital time clock, frost protection and overload protection
- suitable in situations with an odd number of passageways
